

NATURAL GAS PROCUREMENT PROGRAM

In partnership with Direct Energy (DE), CPS offers a natural gas procurement solution for both educational institutions and public procurement units. As energy market conditions are constantly changing, CPS prides itself on delivering up-to-date energy expertise and results, combined with superior customer service so you can always feel comfortable with where and how your natural gas is being supplied.

NATURAL GAS PROCUREMENT PROGRAM

Lancaster-Lebanon Intermediate Unit 13 Collaborative Services (IU13) has partnered with Direct Energy (DE) to offer a Natural Gas Procurement solution for public procurement units. A summary of program details is listed below.

Program Information

Pricing Options: Natural Gas Program Participants can either choose a fixed price or a hedged pricing option. The hedge option is purchased from the wholesale market, ensuing low costs with a multi-year agreement in place to provide strategic procurement opportunities.

Contract: Supplier qualification, due diligence, and negotiated contract is completed and in place. No additional management of the program is required.

Team of Professionals: The procurement process is professionally managed by a team of Direct Energy Market Strategists, with oversight from IU13 and an Energy Advisory Team.

Transparency: A documentation trail is provided for all procurement transactions.

Online Portal: Online account access and billing capability.

Service and Support: IU13 provides dispute resolution with supplier and additional customer service if necessary.

Reporting: Providing participants with monthly and annual reporting containing the following;

- Market summary
- Current program buying group pricing
- Benchmarking data
